

PRESCOTT VANE LLP —PRACTICE TECHNOLOGY
Casebridge □ Novarra Migration —Cutover Scope Notice
February 26, 2016 —distributed firm-wide with the cutover announcement

1. Cutover schedule

Event	Time
Casebridge becomes read-only	Friday, February 26, 8:00 p.m.
Data migration window	Saturday–Sunday, February 27–28
Novarra live, firm-wide	Monday, February 29, 7:00 a.m.
Casebridge decommission	After verification period (target Q3 2016)

2. What migrates

- All **profiled documents**, all matters, open and closed, with profiles, version history and ethical-wall security (approx. 9.4 million documents).
- **Matter records** for all matters opened since 1998, with client, matter name, billing attorney, status and dates.
- **Matter correspondence filed on or after January 1, 2014** (the date the current email-filing module was deployed), approx. 3.8 million messages.

3. What does not migrate

- The legacy **CommsStore module**: matter correspondence filed **before January 1, 2014**, approx. 2.1 million messages. Out of scope under the project charter approved by the steering committee on October 8, 2015. Basis: legacy storage format not accepted by the Novarra loader; vendor remediation quoted at \$412,000 and four months; and the content duplicates email retained in the **firm mail journal archive**, which is and remains the firm's retention copy for email under Records Policy 7.1. The journal archive is a separate system and is unaffected by this migration.
- Casebridge **free-text matter fields** without a Novarra counterpart, including the "Scope Note" field (see §4).

4. Field mapping note —Matter Scope

Novarra's "Matter Scope" is a controlled description field. At migration it is populated from the matter's profiled **engagement-letter document class**: the loader extracts the description of the representation from the engagement letter of record. Post-engagement scope changes are reflected only where they exist as profiled documents (amendment or supplemental letter). Content of the legacy free-text Scope Note field is **not** carried.

5. Retrieving pre-2014 correspondence after cutover

Requests for pre-2014 matter email go to **Records & Information Governance** (H. Grady), who can run a targeted retrieval from the mail journal archive

under the archive search protocol. Allow two business days for routine requests.

6. Support

Log post-cutover issues through the help desk with the prefix **NOV**.
