

LEDGERWOOD REFRIGERATION SERVICES, INC.
Information Technology —Change Notice

Notice	IT-2023-014
Subject	Field service platform migration — Servicetrack to Meridian FSM
Issued	January 30, 2023
Cutover	March 18–19, 2023
Issued by	H. Pinkney, IT Director
Approved by	E. Sowerby, Director of Field Operations; C. Lisle, CFO

What is migrating

Data class	Range	Migrating
Work order headers (number, site, equipment, dates, status)	all history	Yes
Closed amounts and billing references	all history	Yes
Customer and site master data	all history	Yes
Equipment registry and serial numbers	all history	Yes
Technician notes and internal correspondence	2022-01-01 forward	Yes
Technician notes and internal correspondence	prior to 2022-01-01	No
Attachments on work orders	2022-01-01 forward	Yes
Attachments on work orders	prior to 2022-01-01	No

Rationale for the note cut-off

Servicetrack stored technician notes as unstructured free text with no field-level mapping to the Meridian schema. Migrating the full note history was quoted at eleven weeks of vendor time. The steering group elected to migrate two years of notes and retain the remainder in the Servicetrack archive appliance for the statutory period.

What this means in practice

Pre-2022 work orders will appear complete and will not be. A pre-2022 order will show what was done and what it cost. It will not show what the technician observed, what was recommended, or what was said internally about it.

The Servicetrack archive appliance will be retained until **March 2025**, readable by IT on request, subject to extension at the 2024 review.

Not affected

The corporate mail archive is a separate system and is unaffected by this migration. Mail retention remains indefinite.
