WO-134271	2023-02-14	02/14/2023	Rack C-1	Door gasket replacement	2023-02-15
WO-141908	2024-06-11	06/11/2024	Rack A-1	Scheduled valve service	2024-06-11

Records returned: 7. Preventive maintenance visits are not work orders and are not included in this export.

Export caveat —READ THIS

Records prior to **January 1, 2022** were migrated from Servicetrack in the March 2023 platform migration. **The migration carried work order headers, equipment references, dates and closed amounts. It did not carry technician notes, attachments or internal correspondence attached to pre-2022 orders.**

The **First Reported** field is populated at order creation from the order open date. It is not, and has never been, an assertion about when a customer first raised an issue by any other means.

For WO-109331 the migrated record shows equipment Rack A-1 only. Any observation a technician made on other equipment during that visit is not recoverable from this system.
