

RENSHAW CLAIMS GROUP

Preliminary Loss Quantification

Claim	2021-RC-0884
Insured	Brightleaf Markets
Location	Millbrook — Store 14
Date of loss	August 18, 2021
Adjuster	V. Renshaw
Report date	September 30, 2021
Status	Preliminary —subject to final inventory reconciliation

Event

Total failure of the compressor rack serving the store's frozen food line and backroom walk-in freezer, discovered by night crew at approximately 04:00 on August 18, 2021. Product temperature in aisle 12 recorded at 41 °F and in the walk-in at 38 °F at discovery. Product-side telemetry places the onset at approximately 23:40 on August 17; time from compressor failure to that onset is not establishable, the site having no discharge-side monitoring.

Quantification

Component	Basis	Amount
Store frozen inventory, aisle 12 and reach-ins	Physical count, Aug 18–19	\$412,000
Backroom walk-in — regional hub inventory	Staged for 11 stores; transfer manifests	\$1,508,000
Total product loss		\$1,920,000

The Millbrook backroom walk-in operates as Brightleaf's regional frozen transfer hub for eleven stores in the north district. Hub inventory at the time of loss was materially higher than ordinary store-level stock and accounts for 78.5 % of the product loss.

Salvage and mitigation

Product moved to refrigerated trailers between 05:30 and 11:00 on August 18. Salvage value assessed at nil: all recovered product had exceeded the two-hour threshold above 10 °F and was condemned on food safety grounds rather than appearance.

Separately quantified, not included above

Business interruption and emergency transfer costs	\$490,000
--	-----------

Note for subrogation

Service history for the location has been requested from Ledgerwood Refrigeration Services. The insured reports a service order open on the failed rack since May 12, 2021.
