

MEMORANDUM — PROJECT INFORMATION PLATFORM MIGRATION

To: All Staff

From: Teodoro Villanueva, Director of Practice Technology

Date: November 9, 2016

Cutover date: November 28, 2016

Systems: Docuvault 6.2 (outgoing) □ Corvantis Project Suite (incoming)

Approved by: Managing Board, resolution of September 21, 2016

PAGE 1 — SUMMARY

Docuvault is retired on November 28, 2016. All active project information moves to Corvantis. Docuvault remains available **read-only through December 31, 2018** and is then decommissioned.

Every active project team has a migration liaison. Training sessions run November 14 through November 22 in all four studios.

PAGE 2 — MIGRATION SCOPE (READ THIS PAGE)

2.1 Content that migrates — all projects, all years

Content type	Migrates
Drawing files (native and published)	Yes
Specifications and project manuals	Yes
Final submittals and closeout submittals	Yes
Executed contracts and amendments	Yes
Project directory and contact records	Yes
Consultant agreements	Yes

2.2 Content that migrates — projects with activity on or after January 1, 2014

Content type	Migrates
Project correspondence	Yes
Meeting minutes	Yes
Transmittals	Yes
RFI log and RFI records	Yes
ASI log and ASI records	Yes
Submittal review markups	Yes

Content type	Migrates
Field observation reports	Yes

2.3 Content that does NOT migrate — projects whose last activity predates January 1, 2014

Content type	Migrates
Project correspondence	No
Meeting minutes	No
Transmittals	No
RFI log and RFI records	No
ASI log and ASI records	No
Submittal review markups	No
Field observation reports	No

Reason. The DocuVault 6.2 correspondence store uses a proprietary container format that Corvantis cannot ingest without a vendor-supplied conversion service. That service was quoted at \$214,000 and was not approved. The cutoff of January 1, 2014 was set so that all projects with any current activity retain their full record.

Projects affected: 1,847 closed projects, all four studios, spanning 2001 through 2013.

2.4 Exception process

If you have a closed pre-2014 project whose correspondence you believe must be retained, notify Practice Technology **by November 21, 2016**. Those projects will be exported individually to PDF at project team expense. There is no bulk option.

2.5 What this memo does not cover

The firm mail system is not part of this migration. Email is journaled to a separate continuous archive commissioned in March 2008 and is unaffected by the DocuVault retirement. No action is required of staff with respect to mail.

PAGE 3 — RETENTION

DocuVault archival media will be retained under the firm's records retention schedule and destroyed at the end of the applicable period. Nothing in this memorandum changes the firm's retention obligations for drawings, specifications or executed instruments.

Questions: Practice Technology, extension 4120.
