Storm Damage Photo Report — February 2024 Nor'easter

# Photo Documentation of Loss

**Prepared by:** Thomas Brennan

**Date taken:** February 7, 2024

**Claim reference:** to be assigned (Meridian Mutual, policy MPP-2011-44873)

The following photographs document the damage to the scheduled fixed dock and boathouse. (Images described; originals on file.)

| Photo | View                                | Observation                                                      |
|-------|-------------------------------------|------------------------------------------------------------------|
| 1     | Fixed dock, north run               | Decking gone; piles sheared at mudline, several missing entirely |
| 2     | Fixed dock, connection to fuel pier | Utilities (power/water lines) torn away with the dock            |
| 3     | Boathouse, waterside                | Structure collapsed; roof and framing partially submerged        |
| 4     | Boathouse, shore side               | Both marine doors destroyed; frame off its piles                 |
| 5     | Debris field                        | Timber and roofing debris scattered across the basin             |
| 6     | Wide shot                           | Overall view showing extent of total loss to both structures     |

**Summary:** Both the fixed dock system and the boathouse appear to be total losses. No portion of either structure appears salvageable.
