Note on the Division’s earlier production

The Division’s production of May 21, 2024 comprised the complete contents of the SENTRY record for examination 2011-0447 — a summary record and the closing letter of June 28, 2011. That was, and remains, the entire examination file held in the Commission’s examination case system. The documents produced here were recovered from a separate repository and were not available to the Division when the earlier production was made.

The Division does not contend that Respondent’s counsel was on notice of the existence of these documents before this production.
